

ECOairflow **MODEL 6000**  
RESIDENTIAL AIR FILTER BOOSTER

 *New Tips and Improved Electronics*

**FEATURES**

- Significantly enhances the smallest and most harmful pollutants  
*Emits ions which charge airborne particles so that they are more easily attracted to existing filters*
- Improves performance of every air filter  
*Booster will increase the efficiency of any filter by at least 15% within the health hazardous 0.3 to 1.0 micron particle size*
- Maintenance free  
*Has no moving parts*
- Low power consumption  
*Cost effective, as it consumes less than 2 watts of power.*
- 2 - year warranty

*Powerful Ionization*

**Model 6000**

**RESIDENTIAL AIR FILTER BOOSTER**

**HOW IT WORKS**

The Booster uses it's powerful electronic design to safely and effectively charge airborne particles so they will be more attracted to the filter and improve a typical downstream filter by 15% in filtration of the health hazardous 0.3 to 1.0 micron particle range.

The Booster uses internal electronic components to generate an ion field upstream from the filter to charge particles. Charged microscopic airborne particles are more strongly attracted to filter pads. The ion force created by the Booster results in an increased number of dust particle collisions with charged air molecules which in turn results in greater filter efficiency.

It is especially effective when using electrically charged filter pads like those found in ECOairflow models 1010 and 1500. The booster requires no maintenance or replacement parts as it has no moving parts.

**SPECIFICATIONS**

Normal Input Voltage.....	24 Volts
Input Voltage Range .....	18 V min to 30 V max
Power Consumption .....	< 2 watts
Apparent Power .....	Allow 2.0 VA
Input Type.....	Floating
Filtration Boost .....	+15% avg. Filtration efficiency
Warranty.....	2 Years
<i>Operating Coverage (per booster)</i>	
Model 1000 or Passive Throw Away .....	4 Sq. Ft.
Model 1500 or Model 1010.....	4 - 9 Sq. Ft.

***New and Improved Tips and Electronics***

- Upgraded electronics
- Increased output
- Corrosion resistant tips
